2. Once complete, open the downloaded file.

3. Double-click on PaperCut Mobility Print Client.pkg to begin the installation process.

4. Follow the prompts to complete the installation process. When prompted, you will need to enter your computer password to authorize the installation.

Once complete, you should see 2 printers (Toshiba-Anywhere & Lexmark-Anywhere) installed on your MacBook that you can print to from any program. The first time you print, you will be prompted to enter your Name and Password for the printer and it may put the Name from your computer in that field. If it is there, delete it and enter your Messiah College username and password. Check the box to "Remember this password in my keychain" so you are not prompted again next time you print.
